Part 225—Foreign Acquisition

(7) The contracting officer determines that a requirement can best be filled by a foreign end product or construction material, including determinations that—

(i) A subsistence product is perishable and delivery from the United States would significantly impair the quality at the point of consumption;

(ii) An end product or construction material, by its nature or as a practical matter, can best be acquired in the geographic area concerned, e.g., ice or books; or bulk material, such as sand, gravel, or other soil material, stone, concrete masonry units, or fired brick;

(iii) A particular domestic construction material is not available;

(iv) The cost of domestic construction material would exceed the cost of foreign construction material by more than 50 percent, calculated on the basis of—

(A) A particular construction material; or

(B) The comparative cost of application of the Balance of Payments Program to the total acquisition; or

(v) Use of a particular domestic construction material is impracticable;

(b) After receipt of offers—

(1) The evaluated low offer (see Subpart [225.5](#)) is an offer of an end product that—

(i) Is a qualifying country end product;

(ii) Is an eligible product;

(iii) If the acquisition is in support of operations in Afghanistan, a South Caucasus/Central and South Asian state end product listed in [225.401-70](#) (see [225.7704-2](#)); or

(iv) Is a nonqualifying country end product, but application of the Balance of Payments Program evaluation factor would not result in award on a domestic offer; or

(2) The construction material is an eligible product or, if the acquisition is in support of operations in Afghanistan, the construction material is a South Caucasus/Central and South Asian state construction material (see [225.7704-2](#)); or

(c) At any time during the acquisition process, the head of the agency determines that it is not in the public interest to apply the restrictions of the Balance of Payments Program to the end product or construction material.
