

45.606 Contractor scrap procedures.

(a) The property administrator *should*, in coordination with the *plant clearance officer*, ensure that contractor *scrap* disposal processes, methods, and practices allow for effective, efficient, and proper disposition and are properly documented in the contractor's property management procedures.

(b) The property administrator *should* determine the extent to which separate disposal processing or physical segregation for different *scrap* types is or *may* be required. Such *scrap* *may* require physical segregation, unique disposal processing, or separate plant clearance reporting. For example, the scope of work *may* create *scrap*-

- (1) Consisting of sensitive items;
- (2) Containing hazardous materials or wastes;
- (3) Contaminated with hazardous materials or wastes;
- (4) That is classified or otherwise controlled;
- (5) Containing precious or strategic metals; or
- (6) That is dangerous to public health or safety.

(c) Absent contract terms and conditions to the contrary, the Government *may* abandon parts removed and replaced from property as a result of normal maintenance actions or removed from property as a result of the repair, maintenance, overhaul, or modification process.
