Net Weight-Household Goods or Office Furniture (Apr 1984)

(a) *Net weight-full loads.* The net weight of the *shipment shall* be determined by deducting the tare weight of the vehicle (determined by having a certified weighmaster weigh on a certified scale the empty vehicle with all blankets, pads, chains, dollies, hand trucks, and all other necessary equipment inside the vehicle) from the gross weight of the vehicle (determined by having a certified weighmaster weigh on a certified scale the fully loaded vehicle before arrival at destination).

(b) *Net weight-part loads.* The net weight of the first part load *shall* be determined in the same manner as specified for a full load. The net weight of the second part load *shall* be determined by using as the tare weight of the vehicle the gross weight of the vehicle containing the first part load and deducting this weight from the new gross weight (determined by having the loaded vehicle weighed again, in the same manner as specified for the full load). The same procedure *shall* apply for each succeeding part load.

(c) *Weight certificates.* The contractor *shall* attach the original copy of each weight certificate to the *invoice* for services.
