

5117.9000 Scope of subpart.

A Job Order Contract (JOC) is an indefinite-delivery, indefinite-quantity contract and an alternative contracting method to fulfill repair, maintenance, and minor construction requirements on a variety of projects ranging from sustainment, restoration, and modernization, simplified acquisition of base repair requirements, civil works operations and maintenance, small renovations, real property repair and maintenance with an estimated value more than the micro-purchase threshold for acquisitions of construction. A JOC includes a comprehensive collection of detailed repair, maintenance, and minor construction task descriptions or specifications, units of measure, and pre-established unit prices for discrete tasks. Each JOC order is comprised of several pre-described and pre-priced tasks. In general, proposed projects valued at or below the micro-purchase threshold for acquisitions of construction are considered inappropriate for ordering under a JOC because of the administrative costs associated with processing JOC orders and the simplified purchase methods available for these actions.
